## Skills

---

**Languages:** Javascript

**Libraries/Frameworks:** React.js, Redux, Bootstrap, Tailwind

**Tools / Platforms:** Git, Github, Figma

## PROFILE SUMMARY

---

Frontend Developer specializing in building responsive and user-friendly web applications using React.js, JavaScript, and modern UI frameworks. Experienced in integrating APIs, optimizing performance, and creating seamless user experiences across devices.

## Projects / Open-Source

---

### Best-Recipes | [View Live](#) | [View Source](#)

● Developed a feature-rich recipe application using React.js and integrated with TheMealDB API, allowing users to search, browse, and discover recipes, view detailed information including ingredients and instructions, personalized suggestions with advanced filtering and responsive layout

### Registration-Form | [View Live](#) | [View Source](#)

● Created a React.js-based user registration form with real-time input handling, validation, and file upload support, designed to be fully responsive and mobile-friendly, ensuring a seamless user onboarding experience.

### New-Movies | [View Live](#) | [View Source](#)

● Developed a feature-rich movie application using React.js and integrated with the OMDb API, enabling users to search, browse, and discover movies. Features include viewing detailed information such as ratings, release year, and plot, along with a responsive design for seamless use across devices.
